PROFESSIONAL SUMMARY

Creative problem solver and emerging front-end developer, transitioning from trainee to intern with hands-on experience in HTML, CSS, JavaScript, and Vue. Brings a natural leadership mindset and strong design intuition to every project, blending technical skills with a passion for visually compelling, user-friendly interfaces. A creative thinker who enjoys turning ideas into functional, polished web experiences while continuously learning and adapting in fast-paced environments.

EDUCATION

Mount View High School – Cape Town, South Africa

National Senior Certificate (Matric) – Bachelor's Pass

2020 – 2024

Life Choices Academy – Cape Town, South Africa

Full Stack Web Development Internship Programme

September 2025 – March 2026

Coursework: Front-End Development (HTML, CSS, JavaScript, Vue), Back-End Development (Python, APIs), Database Management (MySQL), Version Control (Git & GitHub)

SKILLS PROFILE

Certifications: Full Stack Web Development – Life Choices Academy (2026)

Languages & Tools: Python, SQL, JavaScript, Node.js, HTML5, CSS3, Vue.js, Git

Databases: MySQL, Oracle APEX

Platforms: GitHub, Netlify

FULL-STACK DEVELOPMENT PROJECTS

Project: E-Commerce: CampusGlow, Life Choices Academy

github.com/natheefahrayners

February 2026

Collaborated with a multidisciplinary team to develop a fully functional, student-focused e-commerce web application serving the South African campus market across stationery, homeware, and kitchenware categories.

- Built a responsive, interactive front-end using Vue 3, HTML5, and CSS3; implemented a complete shopping experience including authentication, product catalogue, cart management, and a three-step checkout flow with real-time form validation.
- Translated customer needs and business requirements into a polished, user-friendly interface using a custom seagreen design system with dark mode, loading states, stock indicators, and mobile-responsive layouts.
- Integrated the front-end with back-end payment and referral services, supporting multiple South African payment methods including PayFast, EFT, and Cash on Delivery to meet local market requirements.

Project: ModernTech Solutions: HR Portal, Life Choices Academy

github.com/natheefahrayners

December 2025

Developed a full-stack Human Resources (HR) management web application, enabling HR administrators to manage employee data, payroll, attendance tracking, time-off requests, and performance reviews in a unified platform.

- Architected a Vue 3 + Pinia front-end with Vue Router-based authentication guards, a dynamic dashboard with an interactive HR calendar, and real-time task management – enabling HR admins to track pending leave requests, reviews, and payroll in a single view.
- Built a real-time payroll engine using Node.js and Express that calculates gross pay, tax (18%), and pension (7%) deductions per employee on input, and generates downloadable payslips – automating a previously manual HR process.
- Designed a multi-module system including attendance tracking with Chart.js visualizations, a time-off request/approval workflow, and an employee CRUD interface – translating product requirements into a fully functional, role-based HR portal.
